

PROFESSIONAL SUMMARY

Hands-on experience in building and maintaining web and mobile applications across the full development lifecycle, including requirement understanding, implementation, deployment, and production support. Experience working with modern frameworks and tools to deliver functional and user-friendly solutions based on real project work. Focused on continuous learning and improving technical skills through practical development experience.

WORK EXPERIENCE

Software Developer, Intensiti Elemen SDN BHD

May 2025 - Present

- Developed production web and mobile applications using Laravel, Flutter, Vanilla PHP, and MySQL, delivering SaaS, e-commerce, learning management, asset management, corporate websites, and event ticketing systems.
- Collaborated with project team members using GitHub for source code management, supporting efficient collaboration, version control, branch management, and coordinated development of software features based on business requirements.
- Designed and integrated RESTful APIs and third-party services such as payment gateways (Stripe, ToyyibPay), email services, AI-powered features, and web scraping techniques to extend system capabilities and support data processing functionality.
- Performed bug fixes, software defect resolution, and feature enhancements to improve system reliability and user experience.
- Deployed and managed applications on Linux-based shared hosting environments, including updates, database migrations, and production support.
- Implemented internal backup and file management system utilizing UGREEN NAS storage to improve data reliability and office-level resource management.

Web Developer (Internship), VX Ventures SDN BHD

October 2024 - March 2025

- Maintained and contributed to production web applications using Laravel and MySQL, supporting multiple platforms including a community engagement platform, a school management system for Malaysian schools, and a digital cooperative management ecosystem.
- Collaborated with project team members using GitLab for source code management, supporting feature development, version control, and coordinated code integration.
- Performed bug fixes, testing, and quality assurance for web and Flutter mobile applications to improve system stability and user experience.
- Supported deployment and maintenance of web applications on web hosting environments, including application updates, production support, and database migration processes.

SKILLS

Programming & Markup Languages: JavaScript, PHP, Java, HTML, CSS

Frameworks & Libraries: Laravel, React, Spring Boot, Flutter

Databases & Caching: MySQL, PostgreSQL, Firebase, Supabase, Redis

Infrastructure & Deployment: Docker, Ubuntu, AWS

Authentication & External Integrations: AI Integration (Google, OpenAI), Payment Gateway Integration (Stripe, ToyyibPay), Telegram Bot API, Google OAuth, Google reCAPTCHA, Google Authenticator

Tools & Version Control: Git, GitLab, GitHub Desktop, Postman, Visual Studio Code, Android Studio, Spring Tool Suite, Laragon

Languages: Malay, English

CERTIFICATIONS

Meta Front-End Developer (2025)

Meta Back-End Developer (2025)

EDUCATION

Bachelor Of Computer Science (Software Development) With Honours

2021 - 2025

Universiti Teknikal Malaysia Melaka (UTeM)
