MUHAMMAD ZAHIRUDDIN BIN MUSTAZA

Full-stack Developer | Petaling Jaya, Selangor

muhdzahir248@gmail.com | zahir248.github.io/portfolio | github.com/zahir248

SUMMARY

Full-stack developer with 1.5 years of full-time experience. I build and run production web and mobile apps, from requirements to deployment, support and user training. Eight live products so far, including an Android app on Google Play, an AI report platform and conference ticketing with online payments. Open to full-stack roles in the Klang Valley, hybrid or remote.

EXPERIENCE

Software Developer, Intensiti Elemen Sdn Bhd — May 2025 – Present

- Built NUJUM on my own, an AI report platform for PR teams: six report types, answers from uploaded documents with sources shown (RAG), and paid monthly plans (Laravel, MySQL, Gemini, OpenAI, ToyyibPay)
- Built BINA e-ticketing for CIDB IBS: registration, online payment (ToyyibPay, Stripe), digital tickets and an organiser back office
- Built the MyGooners website (news, videos, service directory, online shop), plus company and school websites that staff update themselves, with role-based access
- Handle deployments, database migrations, automated builds with GitHub Actions, Linux and cPanel hosting, production support, user training and the team's NAS backups

Web Developer Intern, VX Ventures Sdn Bhd — Oct 2024 – Mar 2025

- Fixed bugs and tested live Laravel products for community, school and cooperative platforms and their Flutter app with the team on GitLab; supported deployments and database migrations

Freelance Web Developer — 2026

- ENADD Logistics (Singapore): designed, built and deployed the company website, with a service catalogue and quote requests on every page (HTML, Bootstrap, JavaScript)

PROJECTS

Uros (Google Play)
Personal finance, notes and diary app. Flutter on Android and React on the web, sharing one Spring Boot REST API on Render with PostgreSQL (Supabase) and Redis (Upstash). Google sign-in, two-step verification, session management, PDF reports, English and Malay.

mySekilas (mysekilas.onrender.com)
Interactive map of Malaysia's elected representatives, with live news from 21 portals grouped by story and summarised with Gemini. Location lookup runs in the browser (Laravel, Render).

SKILLS

Core: PHP, Laravel, JavaScript, React, Flutter, Java, Spring Boot, REST APIs, MySQL, PostgreSQL, HTML, CSS, Bootstrap, Linux, cPanel, Git, GitHub Actions

Integrations: ToyyibPay, Stripe, Google Gemini and OpenAI APIs, Google OAuth, reCAPTCHA, Supabase, Upstash Redis, SMTP email, OneSignal, Telegram Bot API

Familiar: Node.js, TypeScript, Next.js, Tailwind CSS, Docker, AWS

Languages: Malay, English

EDUCATION

BSc Computer Science (Software Development) with Honours — 2021 – 2025
Universiti Teknikal Malaysia Melaka (UTeM), CGPA 3.68

CERTIFICATIONS

Meta Front-End Developer and Meta Back-End Developer Professional Certificates — 2025
