MUHAMMAD ZAHIRUDDIN BIN MUSTAZA

Full-stack Developer | Petaling Jaya, Selangor

muhdzahir248@gmail.com | zahir248.github.io/portfolio | github.com/zahir248

SUMMARY

Software developer with 1.5 years of full-time experience building websites and mobile apps. I handle the whole job: finding out what users need, building the system, putting it online, then supporting and training the people who use it. Eight of my systems are in use today, including an Android app on Google Play, an online ticket shop with payments, and an AI tool that writes reports. Looking for a full-stack developer role in the Klang Valley, hybrid or remote.

EXPERIENCE

Software Developer, Intensiti Elemen Sdn Bhd — May 2025 – Present

- Built NUJUM, an AI tool that helps public relations teams write reports, with paid monthly plans (Laravel, MySQL, Gemini, OpenAI)
- Built the ticketing website for BINA, a construction industry conference by CIDB: sign-up, online payment and digital tickets (Laravel, ToyyibPay, Stripe)
- Built the MyGooners fan website and online shop, plus company and school websites that staff can update without IT help
- Put systems online and keep them running: updates, backups, fixing problems and training users (Linux, cPanel, GitHub Actions)

Web Developer Intern, VX Ventures Sdn Bhd — Oct 2024 – Mar 2025

- Fixed bugs and tested live websites and a mobile app for community, school and cooperative clients, as part of the development team (Laravel, Flutter)

Freelance Web Developer — 2026

- Designed, built and launched the company website for ENADD Logistics in Singapore, where customers can ask for a price quote (HTML, Bootstrap, JavaScript)

PROJECTS

Uros (Google Play)
An app to track spending, keep notes and write a diary, on Android and the web. I built the phone app, the website and the server behind both, with Google sign-in and two-step login (Flutter, React, Spring Boot, PostgreSQL).

mySekilas (iesb.com.my/mysekilas)
A website where Malaysians can find their elected representatives on a map and read the latest news about them, gathered from 21 news sites and summarised by AI (Laravel, Gemini).

SKILLS

Programming: PHP, Laravel, JavaScript, React, Flutter, Java, Spring Boot, REST APIs, HTML, CSS, Bootstrap

Databases: MySQL, PostgreSQL, Redis

Servers and cloud: Linux (Ubuntu), Apache, cPanel, AWS (EC2, RDS, S3), Moodle, Git, GitHub Actions

Payments and AI: ToyyibPay, Stripe, Google Gemini, OpenAI

Also used: Node.js, TypeScript, Next.js, Tailwind CSS, Docker

Languages: Malay, English

EDUCATION

BSc Computer Science (Software Development) with Honours — 2021 – 2025
Universiti Teknikal Malaysia Melaka (UTeM), CGPA 3.68

CERTIFICATIONS

Meta Front-End Developer and Meta Back-End Developer Professional Certificates — 2025
